## **ADDENDA TO CONTRACT CLAUSES**

### **INTRODUCTION**

#### **1.0 GENERAL**

1.1 The contractor shall furnish all labor, parts, travel and supervision required to perform preventive and regular remedial maintenance on all Digital Equipment Systems (DEC) and associated DEC manufactured peripherals with some foreign peripherals. The contractor shall not introduce any change that adversely affects the performance, integrity or security of any system or component. All equipment listed in Attachments 1 and 2 to be covered under this contract is located at Naval Surface Warfare Center, 17320 Dahlgren Road, Dahlgren, VA. The equipment listed in Attachment 3 is located at the Submarine Launched Ballistic Missile (SLBM) computer facility at Dahlgren, Virginia.

1.2 The contractor shall maintain the equipment in accordance with both the Original Equipment Manufacturer's (OEM) standards and the Government requirements stated herein for the term of the contract. In case of a conflict between OEM standards and Government requirements set forth in this document, the Government requirements shall govern.

1.3 All computer systems covered under this contract have been maintained in accordance with the original equipment manufacturer's specifications. The Government warrants that systems are installed and in good operating condition; therefore, premaintenance inspection or repair charges prior to the beginning of the contract are not part of the scope of this requirement. Prior to the contract period, the selected contractor may inspect the equipment providing no cost occurs to the Government.

1.4 The fixed monthly charges of this contract which will be included in Section B shall cover preventive and regular remedial maintenance on all equipment during the Principal Period of Maintenance including, labor, replacement parts, all travel, subscription to Original Equipment Manufacturer (OEM) publications (DEC-O-LOG) which will be held by the contractor, obtaining licenses for OEM software diagnostics, preparation of estimates for additional equipment prices, relocation of equipment, shipping cost for replacement parts and any expenses occurred by experts required to assist the local maintenance personnel.

1.5 The contractor is solely responsible for all costs associated with loss or damage of any equipment removed from the Naval Surface Warfare Center for repair. The contractor shall provide a compatible loaner for equipment removed for repair if required by the System Manager. This loaner equipment shall be temporary until the equipment is repaired and fully operational with

### **3.0 MAINTENANCE REQUIREMENTS**

#### **3.1 REGULAR REMEDIAL MAINTENANCE**

3.1.1 Regular remedial maintenance shall provide coverage for all mechanical and electrical parts of the equipment and their interfaces during the contract term (including any extended period through exercise of options) to keep the equipment in good operating condition. Maintenance services shall include labor, replacement parts, test equipment, all travel to/from the site, per-diem, loaner equipment, off site repairs and other expenses necessary to keep the computer systems and associated peripherals fully functional. This includes any expenses associated with the contractor having to call in any technical representative to diagnose a problem that cannot be repaired by the prime contractor.

3.1.2 Regular remedial maintenance shall be performed upon telephonic notification that equipment is inoperative or operating in a degraded mode. The System Manager, COR or SLBM Facility Coordinator is authorized to request maintenance services during PPM. Notification by the System Manager, COR, or SLBM Facility Coordinator that an entire system is down shall place that call for response by the contractor in a priority status over partial systems or peripheral problems.

3.1.3 The contractor shall provide the Government with a designated point of contact and telephone number for maintenance service requests. The designated point of contact shall be conversant with ADP equipment and capable of recording appropriate failure information being reported. The phone number provided shall be monitored during the PPM. No recording devices shall be used to record service requests during the PPM. Failure by the Government to make contact with the contractor will not relieve the contractor of its responsibilities to respond as required by the specifications, and applicable downtime credits will be accrued from the point that notification is attempted.

3.1.4 The contractor shall maintain an inventory of spare and repair parts and such tools and instruments as necessary to ensure rapid maintenance response, to minimize down time and properly and effectively maintain the equipment during the period of the contract. The government will not provide storage for spare parts. Only new or certified as new parts shall be used in repairs under this contract. The Contractor shall identify the manufacturer of all parts that are not OEM parts. Replaced parts shall become property of the Contractor. Any item that retains data must be cleansed or retained by the Government at the discretion of the SLBM Facility Coordinator. Most of these items are tagged; retained items are usually platters from large disk drives. Replacement of items retained or cleansed by the Government shall be at no additional charge to the Government.

3.1.5 For Attachments 1 and 2 Repair of equipment shall be performed on site at NSWCCD and will be accomplished by the replacement of the smallest Field Replaceable Unit (FRU). The FRU shall commonly be boards, subassembly, submit, terminals, keyboards, terminal servers, bridges, repeaters and transceivers. Repairs are not be performed to the component level.

3.1.6 For Attachment 3 Repairs shall be accomplished by replacement of the largest field replaceable unit (FRU). FRUs shall commonly be printed wiring boards, cable assemblies,
